SUMMARY

Aspiring Business Analyst with practical experience in requirement analysis, PRD/SRS documentation, and BPMN/ERD modeling across real client and academic projects. Proven ability to translate business needs into user stories, system workflows, and deployable products, including a live mobile app on Google Play. Strong analytical mindset with solid understanding of system design and stakeholder communication.

SKILLS

Business Analysis: Requirement Elicitation & Documentation (PRD, SRS), User Story Mapping, Use Case Modeling, BPMN, Stakeholder Communication, Agile (Scrum)

Technical Knowledge: RESTful APIs, Database Modeling (ERD), Basic SQL, System Design Fundamentals

Tools: Jira, Figma (Wireframing & Prototyping), Postman (API Testing), Git/GitHub, VSCode

Languages: English (TOEIC 865)

PROJECTS

Interprovincial Car Booking Platform

Aug 2025

- Collaborated with a real client to define an **O2O booking model** using Zalo instead of in-system transactions.
- Modeled business workflows using **BPMN** and defined key **use case** for booking interaction.
- Authored **SRS** including **5 user stories**, and **20+ acceptance criteria** aligned with real system behavior.
- Designed **ERD** and implemented data integrity logic.
- **Project Links:** [Explore Platform](#) | [Case Study - Business Workflow](#)

FinTracker – Personal Finance Management App |

Sep 2025 - Nov 2025

- Translated business needs into **PRD** and **SRS** for development.
- Defined **12+ user stories** and **3 key user flows** for a personal finance tracking system.
- Owned the release process and successfully launched the application on **Google Play**.
- **Project Links:** [Google Play Store](#) | [Case Study - Product Planning](#)

Internal LMS for Automotive Department – HCMUTE

Oct 2025 - Dec 2025

- Analyzed and defined requirements for an **internal multi-role LMS** with **3 user roles** (students, lecturers, administrators).
- Produced key system design artifacts including **SRS, ERD, BPMN**, and **3 Use Case Diagrams**.
- Reached **100+ registered users** within the department, validating core learning and assessment workflows.
- Aligned product artifacts with implementation stack: Next.js, TypeScript, Supabase, Tailwind CSS.
- **Project Links:** [Case Study - System Design](#)

EXPERIENCE

Mobifone Authorized Dealer

2023 – 2024

Customer Consultant (Part-time)

- * Identified customer needs and pain points to recommend suitable telecom solutions.
- * Analyzed customer behavior and proposed tailored service packages based on usage patterns.
- * Communicated with diverse customers to clarify requirements and improve service alignment.

EDUCATION

Sai Gon University

B.S. Software Engineering

Expected Graduation: 2027

Ho Chi Minh City, Vietnam
